IT'S SAFE

We value **Safety** over anything else

"Years of experience in designing textiles along with an eye to understanding the customer's absolute need have given life to the concept of Doctor Towels. Before launching the product, our team carefully analysed the problems and risks that arise due to inappropriate usage of towels and studied the damages it can cause on human health. We looked into customer behaviour patterns and carried out various lab tests. After months of trial and error, Doctor Towels found the perfect recipe to design the best towels which are aesthetically great, have a clear purpose for its user and at the same time, have properties to fight against bacteria. Your skin and you are going to love it!"
